

北京科技大学

The introduction of The University of Science and Technology Beijing

The University of Science and Technology Beijing (USTB) was founded in 1952 following the amalgamation of the best departments in related fields of five eminent universities as a result of a nationwide reorganization of the higher education system. Over half a century of remarkable growth, it has developed into one of the most influential key national universities sponsored by the Chinese Ministry of Education. USTB is renowned for its study of metallurgy and materials science. Its main focus is on engineering; at the same time it maintains a balanced programme of science, management, humanities, economics and law. It was one of the first universities to be entitled to establish state-approved graduate schools and was chosen to be part of China's "211 Project", which is designed to develop a hundred first rate universities in the 21st century. In 2006 it was also selected as one of a select group of pilot universities for the "Platform for

National Advanced Disciplines Innovation" program. USTB values greatly and will for ever cherish its long tradition of being "Rigorous in Learning and Research and Venerating Practice". Over 100,000 graduates are contributing to society all over the world; most of them have become professionals and joined our national elites in the field of politics, economics, science and education. As metallurgy and materials science are the two disciplines for which it is most renowned, USTB is also known as "the cradle of iron and steel engineers". USTB is now working hard towards its goal of becoming one of the top-ranking research universities in China and an internationally renowned higher education institute with its own distinguishing features. While retaining its current leading position in metallurgy and materials sciences, it is making great efforts to develop other areas and to achieve a balanced disciplinary structure in engineering and technology, science, management, economics, social sciences, humanities and the law.

The prospectus of course

Chinese short course introduction

USTB is offering the most excellent Chinese language training course for overseas students to savour the elegance of Chinese culture and this featured course is far more than the language classes. The Chinese short course at USTB is a marvellous showcase of kaleidoscopic refined Chinese culture to help the deeper insight into its forever grace.

The course structure and culture-experiencing tour in Beijing

1 Language Class (4 weeks)

Class hours: 8:00 to 11:35 (Mon-Fri)

Intensive Chinese language training to improve the speaking and listening comprehension in excellent class environment. The class will trigger off the students great interest in achieving communication ability by active interaction with Chinese native speakers in vast variety of contexts. The students will be allocated to different classes at different levels by their own language ability after test. The certificate will be issued to qualified students at the end of the course.

2 culture-experiencing class

Every afternoon along the course, the students will be given the intuitive experiencing over multifaceted traditional Chinese culture including ancient garments, tea ritual, calligraphy, paper-clipping as well as Chinese Knot.

3 featured city tour

The USTB will provide the packaged tour at three week ends during the course including Great Wall, Forbidden Palace, Summer Palace as well as Nan Luo Gu Lane.
